Five-Week Evening Carpentry and Joinery Course

Thursdays, 18:00–21:00 | £400.00 including VAT

Course Overview

This five-week evening course provides practical training in carpentry and joinery. It is suitable for complete beginners, those seeking to improve existing skills, and anyone considering a career in the construction trades.

The course can be tailored to individual learning needs and leads to an in-house certified qualification.

Typical Curriculum

- Identify the tools of the trade
- Use and maintain carpentry hand tools correctly
- Develop essential carpentry hand skills
- Take accurate measurements
- Prepare carpentry and joinery power tools
- Produce basic woodworking joints
- Recognise different types of materials
- Mark timber square
- Saw timber square to a line
- Mark out timber from face to edge
- Saw to the required edge
- Use a chisel to remove timber

Course Delivery and Assessment

Each unit begins with a full demonstration before practical work commences. Training is delivered to a high standard, with support provided throughout the five-week course.

Learning is reinforced through continuous assessment, tutor feedback, course validation, and practical evidence. This approach helps participants build a strong foundation for further development and employment within the building trade.

Course Fee and Inclusions

The course fee is **£400.00 including VAT**. All tools and materials are supplied, and hot and cold drinks are available during breaks.

Clothing and Safety

Please wear suitable clothing. For safety reasons, participants must provide and wear their own safety footwear.

Flexible Attendance

We aim to accommodate individual requirements wherever possible. If your training is interrupted, it may be resumed within an agreed timeframe.
